North Sea Resins: Landscape Repair

Key Attributes-

- Repair uses Cure-on-Command resin that cures in 30 seconds by Blue Light
- Resin cures at 20°F as fast as it does at 110°F, to wet or dry surfaces
- No Mixing, single component resin provided in syringe.
- Restore pressure immediately after 30 second “Blue” light cure procedure

Pic 1. Holes caused by landscaping company

Pic 2.- With pressure relieved, immediate repair done despite moisture in line.

Pic 3. Repairs complete, pressure restored.
